PROFESSIONAL SUMMARY

Full-stack developer skilled in React, Node.js, and ASP.NET/C#, with 5+ independently built applications spanning desktop, web, and AI-integrated systems. Strong SQL and database design foundation (HackerRank-certified). Currently expanding into cloud deployment and CI/CD.

EDUCATION

Bachelor of Science in Computer Science (Expected 2027)

University of Engineering and Technology (UET), Lahore

TECHNICAL SKILLS

Languages: C#, Python, JavaScript (ES6+), SQL, C, C++, HTML, CSS

Frontend: React.js, Next.js, HTML5, CSS3, TailwindCSS

Backend: Node.js, Express.js, ASP.NET Core Web API, Flask

Databases: SQL Server, PostgreSQL, MongoDB

Tools: Git, GitHub, GitHub Actions (learning), Visual Studio, VS Code

Concepts: REST APIs, MVC, OOP, JWT Authentication, RBAC, CRUD

PROJECTS

Library Management System — C#, WinForms, SQL Server, ADO.NET

- Built a desktop application managing hundreds of book and member records, **measured by** reduced manual record-lookup time, **by** implementing indexed SQL queries and a searchable WinForms UI with filtering and reporting
- Ensured data integrity across CRUD operations, **measured by** zero data-loss incidents during testing, **by** applying OOP design patterns and parameterized ADO.NET queries

Student Record Management System — C#, WinForms, SQL Server

- Secured student and staff data access, **measured by** eliminating unauthorized record access in testing, **by** implementing role-based access control (RBAC) and login authentication for admin/staff roles
- Prevented SQL injection vulnerabilities, **measured by** passing all manual security test cases, **by** using parameterized queries across all database operations

E-Commerce Full-Stack Web Application — React.js, Python, MongoDB, REST APIs

- Delivered a production-style multi-page e-commerce platform, **measured by** supporting full user auth, product, and order workflows, **by** architecting a RESTful API in Python with JWT-based authentication and protected frontend routes
- Improved data flexibility and query performance, **measured by** reliably handling concurrent product and order records, **by** integrating MongoDB as a NoSQL data layer with a component-based React frontend

AI ChatBot — "Zahanat AI" — React, Python, MongoDB, LLM Integration

- Built and deployed a full-stack AI chatbot, **measured by** achieving responsive performance across all screen sizes, **by** integrating an LLM API with a Python backend and React frontend, version-controlled via Git and hosted on GitHub Pages

Portfolio Website — *HTML, TailwindCSS, JavaScript, React, Express*

<https://port-folio-cood.vercel.app/>

- Designed and shipped a personal portfolio site, **measured by** full responsiveness across screen sizes, **by** building with vanilla HTML/CSS/JS and deploying via GitHub Pages

CERTIFICATIONS

- HackerRank SQL (Basic/Intermediate) — verified proficiency in joins, subqueries, and query optimization

LANGUAGES

Urdu (Native) | English (Professional Proficiency)
